Henry Rosas

I Tooked OFF From NOT on a local flight I went to Sussex (KFUN) did a couple full stop landings on runway 03. then headed back to (NOT) Lincoln Park on my way back I did a few maneuvers: Slow Flight, Power off stall and Power on stall and couple 360° slow flights and then went direct to (NOT) when Approaching the Airport the wind is coming from 320° @ 10 to 21 Kts. I Performed @ the Airport three full stop landings all of the landings when normally, but when I did the last one approaching the final my speed was 80 to 85 Kts because of the strong gusty wind.

I landed the plane, but the plane bounced once I try to regain control, added power and that moment was a strong cross wind, I felt strong lifting wind under the plane and before I knowing the plane was in the woods.

Sincerely yours:

Henry Rosas,

Henry & I flew Sunday (5-23-2021)
as a passenger at Lincoln Park (N07)
at around 4 pm. Henry decided to
fly to Sussex Airport which he
decided to land a couple of times

From there he decided to head back to
Lincoln Park. He decided to do
more cross/landing to practice.
all landings were beautifully executed.
On the 4th landing the plane bounced
once and unexpectedly a strong
gust wind lifted the plane off the
ground. I heard the engine
rev up high & I saw him try
to gain control of the plane.

Before I knew it we were in the trees.
