

To whom it may concern,

This is my statement regarding the aircraft (N472SP) taxiing incident that occurred on July 21st, 2021 at approximately 8:15 8:30pm. I departed an hour earlier with two others with me. After an uneventful flight from KBKV to KCGC and back to KBKV, I landed on runway 27 and was given clearance back to American Aviation Flight Academy. I taxied the aircraft back to the FBO and was going to pull into the right most parking spot, from which the plane was parked when I got there. I then noticed that the other aircraft were already in the hanger, and decided to pull up to the front of the hanger to help push it inside for the night. As I was taxiing forward I misjudged the distance from the wing to the hanger and impacted the hanger with the right wing/wingtip. No injuries were sustained from myself or the other passengers.
