State regarding Incident of Wednesday, August 18, 2021:

I was a passenger in Helicopter N777TC on Wednesday August 18, 2021.

The flight was flown by my Friend Tim Cook, who owned the helicopter. While he was taking off from 8A3 airport in Livingston TN the engine showed signs of failure at 200-300 feet above runway 3. The pilot attempted a landing straight ahead. We impacted the grass left of the runway and hit hard enough to collapse the right-side landing gear. The helicopter rolled on it's right side and slid to a stop.

We were both blessed to be NOT HURT.
