Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Other Property: Trees at the accident site were damaged by the impact of the aircraft. No other homes or structures were damaged.
Aircraft: After descent through trees, both the right and left wing were partially separated from the fuselage. The engine appeared separated from the front of the aircraft and the front of the aircraft appeared collapsed up to the passenger compartment.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a training flight with Roy Griffin in his Cherokee 6 on 8/28/2021, we departed Spartanburg Airport at approximately 10:39 to Morganton NC and returned to Spartanburg SC. It was uneventful until the before landing phase of flight. As we approached mid field at Spartanburg to cross and enter a downwind for Rwy 23 the engine lost power. Roy (the student) and I ran the emergency checklist (to no avail). I took over control of the aircraft. No options were left except to land in the trees. After the aircraft came to rest, the student pilot and myself evacuated the aircraft through the broken pilot windscreen and the rear seat passenger was evacuated from the aircraft using the rear passenger door.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Until a cause of the engine power loss is determined, it is difficult to suggest what might have prevented this accident from occurring.

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
