Nice speaking to you this morning. A rundown of yesterday Sept 14.2021. Met with my flight instructor at Oldbridge airport 3N6 to get ready for next week's sport pilot oral exam and checkout ride. Went over cross to Andover 12N to Monmouth jet center KBLM back to Oldbridge 3N6. Did five takeoff and landings together at 3N6. I departed solo to Andover wind was reported variable, made a radio call at 10 miles and at 5 miles no one reported back what runway was in use, flew over field at 2500 ft wind sock was indicating no wind made right traffic for runway 03 went around high approach. made right traffic for 03 again landed and applied brakes at end of landing roll and airplane overturned. Thanks Gregory Fodor
