

RECORD OF INTERVIEW

Daniel P. Boggs
Air Safety Investigator
National Transportation Safety Board
Office of Aviation Safety - Eastern Region

Date: 11/2/2021 @ 1400 EST
Person Interviewed- Michael Robinson / Craig Phillips- witnesses
NTSB Case Number: ERA22LA031

Narrative:

Mr. Michael Robinson and Craig Phillips were interviewed by telephone on a 3-way call.

Mr. Robinson, who lives near 3J6, stated that he and his wife had just parked their car in their driveway when his wife looked up and saw the accident airplane fly over. He then walked inside his house and received a telephone call at 1914 from Craig Phillips who lives down the road. The neighbor said the airplane just flew over his house, flying east, and he noticed that the right navigation light was not operating. He further stated that it was too dark outside, and he could not see what color the airplane was, so he did not know who was. During the telephone call, Mr. Robinson heard the airplane crash and could hear the engine running "like it was hitting something." he and his wife drove in their car to the accident site, which took about 30 seconds, to help in any way they could to get the pilot out of the airplane.
