Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right and left engine impacted into trees, both engine cowlings destroyed, engines pushed back into fire wall area. Right and Left props destroyed, Right main gear broken. Substantial damage to right wing. Some damage to nose and left wing. One PAPI on runway 5 destroyed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flight was planned and conducted under VFR conditions for the entire flight segment. My wife and I were the only two occupants. Departed KTBR, Statesboro, GA at approximately 1035 EST. Climbed and cruised at 6500MSL from KTBR to FA40, Hidden Lake Airport (private). Entered the pattern on a left downwind for runway 23, landed smoothly in the touchdown zone with the stall warning horn beginning to sound as the wheel touched down (on speed). I allowed the aircraft to roll out for some distance where it remained on center line. At approximately 2/3rds down the runway I began to apply brakes at which point the aircraft immediately veered sharply to the right. Attempts to steer and differential brake the aircraft to the left were to no avail. Aircraft departed the right side of the runway, first striking one of the PAPIs then continuing to the right and impacting the right engine on a pine tree then the left engine on another pine tree with the nose coming to rest between the two trees approximately 3/4th down the runway on the right side. Once the aircraft departed the runway there was no controllability as the plane slid on the soft sandy soil and pine needles. The gear also was collapsed at planes final resting point. My wife and I exited the aircraft out the cockpit side door with no injuries.

From the pictures that will accompany this report, there are indications of something dragging into the asphalt surface with the tire marks of the right wheel. Since the gear was broken at the final resting point, an initial determination as what the malfunction could have been has not been determined. Pictures to accompany this report have been sent to Leah D. Read, NTSB-Eastern Region. Additional pictures can be obtained through the insurance adjuster, David Gourgues, McLaren's General Aviation at [REDACTED] or [REDACTED]
