Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft substantially damaged. Wing, fuel tank and fuselage damage from impact with airport perimeter fence.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 11:40am on 11/19/2021, I initiated takeoff on runway 30 at KGFL. After a normal ground roll, the aircraft began to climb on the upwind leg. The landing gear was brought up while aircraft was over the departure end of 30. At an estimated altitude of 300-400ft MSL, the aircraft experienced a sudden decrease in power. I immediately lowered the nose and began a shallow right turn back towards the airfield. During the turn, mixture was verified in the rich position and power was re-applied resulting in an engine backfire. I closed the throttle and committed to landing in the open area of the airfield just to the north of runway 19 which was now directly in front of the aircraft. During the attempted emergency landing, the aircraft struck an airport perimeter fence. Both myself and passenger exited the aircraft through the right wing entry door and cleared the immediate area.
