Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damaged front steering linkages, propeller, engine cowling, front-wheel strut, vertical stabilizer and wings.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Departure time: 10:00am EDT
 Departure location: KCRG
 KCRG ATIS and KCRG METAR 1353Z on 5/29/2022
 Intended destination: KCRG
 Terrain - grass field to side of runway 32

Summary:

KCRG ATC cleared me for takeoff right pattern for 32 with reporting at midfield. Flew to midfield and reported in, KCRG ATC cleared me to land for touch-n-go. I made approach for short field landing practice on 32, landed the plane successfully on 32. I then turned off carb heat and added full power, while raising flaps from 30 degrees back to take off configuration the plane started pulling very hard to left, I tried to correct with full right rudder and then right brake with no success. Plane continued pulling hard left, so I killed the power and ran off runway, I continued to try to turn right to correct the planes left hard turn, while in grass and then the plane flipped.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Not sure how this could have been prevented as the plane had mechanical failure which prevented the control of steering on the ground.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
