☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The propeller struck ground and got bent. The vertical stabilizer was bent. There was a dent to the leading edge of the right wing near the tip. The right strut was bent at the fuselage attach point.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 3rd, around 10:30 I departed KTTA with Andy Haupricht on the right seat for a checkride preparation dual in my Taylorcraft BC12D, tail number N44374 towards the training area over Pittsboro. We did a few maneuvers like steep turns, clearing turns etc and started heading back to KTTA. We were about 10 miles from KTTA when the engine sputtered and slowly died. I looked to make sure that the fuel guage on the main fuel tank was showing fuel and turned on the valve for the wing fuel tank. But this did not help. We immediately started looking for a landing spot and started turning around. Me and Andy looked around us to spot the best place to put the plane down and simultaneously tried several things to get the engine started. We tried the carb heat, magnetos and the primer as well. I also checked to see if the main fuel shutoff valve was all the way in, which it was. Andy suggested a few spots and since we were losing altitude steadily without the engine power I spotted a wheat field to the right and we decided to head to this field. It had tall trees between us and the field and I was very much aware of the height of the tree top below us and carefully adjusted the pitch to make sure we did not hit the tree top. Once we were past the tree top I tried to bring the plane down on the field as short as possible as the field was bordered on three sides by thick tree growth and did not want us to roll into the trees. As we touched down we were still carrying a lot of energy and though we started rolling on the wheat field the landing gear seem to get stuck in a rough patch and I felt the tail lift and the prop hitting the ground and eventually landed on the top upside down. I was hanging by the seat belt and also saw Andy hanging upside down by the seat belt. I immediately called out to Andy to see if he was ok and was relieved when I heard an "I am ok" from him. He tried to get the door open, release his seat belt and crawl out and I did the same. Andy asked if I had a toolkit to disconnect the battery terminal and promptly got the screwdriver and disconnected the battery terminal. I tried calling a few friends and finally got my neighbor to come and pick us up. The Pittsboro sheriff and the Emergency Management personnel took down our details and contacted FAA and NTSB. Later when we got back to KTTA I called both the FAA FSDO at Greensboro and the NTSB contact number provided by the Emergency Management officer and left a voicemail.

RECOMMENDATION (How could this accident/incident have been prevented?)		
Operator Owner Safety Recommendation		
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)		
Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i>	Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours	
FUEL & SERVICES INFORMATION		
Fuel on Board at Last Takeoff <i>(Convert from pounds, as necessary)</i> 12 _____ Gallons	Fuel Type ☒ 80/87 ☐ 100 Low Lead ☐ 100/130 ☐ 115/145 ☐ Jet A ☐ Jet A-1 ☐ Jet B ☐ JP8 ☐ Automotive ☐ Other, specify _____	
Other Services, if Any, Prior to Departure None
