NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 26, 2022 I was traveling from KPIE to KCCO on an IFR flight plan at 8000 ft.

At approximately 20 miles from KCCO, I was directed to descend from 8000' to 5000' and contact ATL approach on 119.8. Approximately 1 minute after checking in with ATL approach, the engine RPM's dropped from 2350 to 1500. I immediately turned on fuel pump, enriched the fuel mixture to full rich, verified both fuel tanks were in the ON position and scanned the gauges to which everything else seemed normal. At that time, approximately 30 seconds later, I reported engine problems to ATC, asked for the closest airport and declared an emergency. I was then vectored to a 180 Heading and advised that 5A9 would be 7 miles ahead on that heading. I established a visual for Runway 18 and at that time had the altitude to make the field while the plane continued along at 1500 RPM's. Approximately 3 minutes, after the initial check in with ATC, the engine RPM's dropped from 1500 to 500 and then 2 seconds later to zero. At the point, I realized a glide to runway 18 was not going to be possible. I set up a speed for best glide, approximately 100 kts and located a field at my 11:00 position. As I approached the field, not only did I see power lines and hay bales, but also realized I did not have the glide for that option either. I then focused on what appeared to be an old logging road that was boot legged in shape, and I did my best to put the airplane on that road.
