

07/03/22

At About 7:10 AM T witness
SILVER A-10C14 according to About
150 Feet and spiraling out
OF control with left wing
Hitting the ground.

Matthew Broadwater

7/3/22

On July 3, 2022 at approximately 0710 I witnessed an aircraft accident on runway 01-19. The aircraft attempted to land once, damaging the right wheel and resulting in the wheel becoming disconnected. The aircraft, after hitting the ground once, began to ascend once more, spin in the air and crash to the ground upside down. I got in an airport vehicle and went to the crashed pilot and saw severe damage to the man's head. I then contacted emergency services.
