Jordan Dornan's Incident Statement -07/14/2022

On July 8th, 2022, I started my day at Crabbe Aviation in Elizabeth City, NC with looking at my iPad at weather. I drove out to the airport and got the airplane out. The loader fueled the airplane (single point refueling) while I was getting the airplane and gear ready for flight. I flew the airplane directly to Tappahannock Airport where the ground ops guy gave me the maps for the day and refueled the airplane. The ground guy (Greyson) loaded the airplane with chemical. I then began my first load of 7 loads planned for the day at the Tappahannock Airport. I departed the airport around 2:30 for my 6th load to spray a field about 7 miles southeast. While completing a turn (300-400 feet agl), flying east/west-winds around 10-12 miles an hour that afternoon, during one of the final passes in the field I could hear and feel the engine slowing down/losing power. I don't recall looking at my gauges at that point. I was focused on where I was going to land and flying the airplane. Within those few seconds I was looking for a spot to land. I saw a cut out within the trees. I lowered the nose and was aiming for the field. I tried touching down in the field in hopes of slowing down before the trees but my airspeed was still too high. It bounced and propelled into the tops of the trees. My memory is vague from that point until I was out of the plane and looking for help. At that point I called my wife, my boss, and my dad. My boss spotted me by airplane and sent somebody to pick me up. I started walking until I saw a truck and they took me to the hospital. At that point I didn't know the damage to the airplane or to myself.

To Note:

1. Max torque was 1500-1550 temp was around 690-710.
2. My Fuel flow for spraying 1500-1400 torque and 2000 rpm was (3 bladed prop) 60-61 GPH. This was higher than other 502b models I've flown in the past for those settings.
3. After the accident I can remember smelling burning plastic and metal.

I reported the fuel fuel flow and the torque/temp on takeoff to my manger a few days before incident. My manager, Matt, scheduled an AMP to come look at both airplanes at Crabbe Aviation to assess any maintenance/squawks needed.
