Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Left landing gear collapsed, Left side fuselage damaged, Left outer wingtip damaged.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 8 around 10:15 AM EST owner of aircraft was high speed taxi testing to see how the newly installed engine would perform on the runway and intended to lift the tail and put it back down and keep leave runway 15. But when owner applied power the aircraft quickly left off the runway and became airborne accidentally. I then decided at this time as the aircraft was about 60' off the runway. I climbed out and flew south over the ocean beach to learn the stall speed. When returning to land at ^{runway} 15 I joined the 15 left pattern and on final allowed the aircraft to be too slow and the wing stalled at an altitude of 25' and had landed on 15.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Do not apply excess power on taxi testing
with a unpowered engine.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
