Pilot Statement – Incident at Briscoe Field in Gwinnett County, Georgia

Date of Incident: July 17, 2022
Date of Statement: July 19, 2022
Pilot: Michael Forrest Lamb
Certificate: [REDACTED] (Student Pilot) Issued on 21 Dec 2021
Aircraft: Cessna 172 P Tail Number N62405

I, Michael Forrest Lamb, was the Pilot in Command of the Cessna 172 P with Tail Number N62405 on the afternoon of July 17, 2022 when the incident at Briscoe Field occurred.

I was returning from Anderson airfield (KAND) in Anderson, South Carolina as one of my solo cross-country trips required to obtain my pilot's certificate. This was my first solo cross-country trip after receiving my solo flight endorsement on May 17, 2022 and completing the required cross-country training flights on June 12, 2022 and July 14, 2022. To date, I have approximately 33.2 total flying hours logged with 1.6 hours of solo flight and 105 take-offs and landings.

I made initial contact with the Gwinnett Tower (KLZU) approximately 12 nm to the northeast of the field indicating I was in-bound and requested a full stop landing at The Flight School. I also confirmed that I had received ATIS Quebec as the current weather report. ATIS Quebec stated that there was a 5-knot wind (I cannot remember the exact direction), 10 nm visibility, ceiling at 4,200 ft (approximately – I know it was above 4,000 ft but not exactly sure what altitude) and altimeter setting of 30.08.

At approximately 6 nm from the field, I was given clearance to come straight into the field on final and land on Runway 25 as the third plane in line to land. I acknowledged the clearance to land on Runway 25. I saw the two planes in front of me land and I continued on final to land on Runway 25.

Prior to landing, I was on the correct glide path, I had my flaps fully extended (30°) and I was at approximately 63 KIAS. As I was landing on Runway 25, after I crossed the runway threshold and began my landing, I cut the power to idle and started my flare. Just before I touched down, I experience a shift of the airplane nose to the left. I am not sure what caused the shift of the heading of the aircraft. A second later, I touched down with the nose of the plane pointed towards the edge of the runway, not down the runway. I could not recover in time from rolling off the runway and partially onto the grass. I was able to correct my course slightly which kept the plane partially on the runway and partially on the grass but could not steer back onto the runway. I was eventually able to bring the airplane to a stop in the grass between Runway 25 and taxiways D and W.

I was the only occupant of the plane and was not injured in the incident. Visual inspection of the plane just after the incident indicated the tire on the front landing gear was flat but no other damage was visible.
