1							

Job: 1

Problem:

Aircraft heavily damaged due to going off of the runway upon landing.

Areas with damage are as follows:

Engine compartment
fire wall
engine Cowling's
Nose gear bent 90degrees
RH landing gear de-matted from aircraft upon landing
Both under wing damaged with puncture hole
RH main gear areas has major structure damage with a hole
Aft Fuselage has a hole in it
both Flaps damaged beyond repair

Multiple sights of composite and structural damage that will require Cirrus engineering drawings. There is a chance that Cirrus will not approve the repairs of this aircraft due to the extent of damage. The outside service [REDACTED] is our estimate for the engineering documents if Cirrus approves repair
