NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of June 29, 2022, I successfully preflighted the above-referenced aircraft I/A/W Piper 32RT-300 Checklist. At 11:40am, after a normal taxi and runup, I began my takeoff on runway 09 at 03NC. This was a routine for pleasure local flight with another pilot neighbor. The aircraft left the ground and the initial climb was established. Within 3-5 seconds just a few feet above the runway, the engine hesitated and stopped developing normal takeoff power. I immediately aborted the takeoff, landed back on the remaining 500ft of the runway and attempted to stop the aircraft. The pavement was wet because of light rain and skidded into the grass just east of the runway. Even though I continued to brake, the aircraft momentum was such that I continued another 20 yards and came to a stop in a shallow retention pond. The nose and wings of the aircraft were mostly submerged. I along with my passenger exited the aircraft without difficulty through the main cabin door on the port side of the aircraft.
