Flight Synopsis 27 August 2022

Weather that day was around low to mid 70's with mild westerly wind, cloud base between 2500-3000 AGL. My passenger and I went out for a leisure flight on the K7. We were towed to 3000 feet in a westerly direction toward a large cloud. Clouds were scattered and perhaps a few 100 feet below. We descended and were able to get some lift and maintained altitude for a while. At around 2500 feet I made the decision to return to the field. On return we found no further lift but instead heavy sink. As I approached the Chautauqua Lake High School, I realized at our current sink rate I could not make it back to the field. I had limited options on landing. What seemed to me as the only viable option was a field immediately to the left. As I made a turn to that field, we lost altitude and impacted a thicket of trees and shrubs.
