Departed Kotzebue at 250 pm on September 9, 2022 in N8019Z. 1 passenger and gear onboard, approximately 58 gallons of fuel on board and 11 quarts of oil for a 2 hour flight to look for a gravel bar on either the Buckland or Kiwalik Rivers. Weather was scattered to broken clouds, lots of sunshine, light winds, and unlimited visibility. At 330 pm in cruise flight the motor shuttered and lost power, I immediately turned towards the nearest airport of Buckland. I maintained a safe airspeed but was unable to maintain altitude. I pushed in the throttle, tried switching fuel tanks, and turned the boost pump on, none of these actions helped. I broadcast on the radio that I had lost our motor and we were going to land just upriver of Buckland. The motor continued to shake and run rough with loss of power until a loud clunk and the prop suddenly stopped. I continued to maintain a safe airspeed and added in flaps in preparation for a forced landing.
