NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State time and point of departure, intended destination, and services obtained.

Arrived at ~~K~~ KSZP mid day to build gyro proficiency in the pattern. Accomplished ~~two~~ wheel balance exercises the length of the runway. Proceeded with two take offs and landings. Minimal wind straight down the runway - nice afternoon. Back in the pattern a third time but for touch and go. Landed okay and commenced take off roll/wheel balance. Gyro was tending to roll left once airborne - approximately 2' off runway. Left main touched. Attempted to correct for the roll by moving cyclic right - Rolled to the right and rotor made contact with runway. Down! Gyro on its right side and slid around opposite direction of travel. Pilot exited unhurt...

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

CFI's for gyroplanes are relatively scarce. Gyroplanes are more make and model specific than fixed wing aircraft I have flown. In addition ~~to~~ to hours flown to gain endorsement proficiency for a gyroplane I believe five hours of dual time in make and model (inclusive of HP rating) would be extremely beneficial to an owner/operator.
