Subject: Plan crash Carolina Rd. Suffolk, Va

On January 7th. at approximately 12:15 I was a passenger in front seat of a car traveling north on Carolina Rd. Suffolk Va. My field of vision was from windshield of vehicle with sun visor down. The tail of plane was located north, north, west. The nose of plane was angled south, south east but descending vertically, I estimate it was approximately at a 10 to 20 degree angle from being vertical. There were 2 black, narrow, parallel streaks behind the tail of plane. I observed no fire coming from plane. The plane went out of sight behind a stand of mature pine trees.

I instructed driver to slow down because I didn't know where the plan was going to be. We pulled into a driveway of a house where we saw smoke behind the house. The driver observed a person in backyard, I yelled to her "plane crash", she said she was on the phone with authorities, I observed her continuing to walk to a pile of "yard debris" where there was a piece of smoking debris approximately the size of a basketball and another small spot of smoke. I asked if she needed help, she said "no, my husband is back there. She picked up a green neon piece of fabric, stood on a stump, still on cell phone waving the fabric in a circular motion. I observed smoldering smoke in the tall overgrown field in several places and saw fire at the largest area of smoldering smoke.

We left so we would not be in the way of emergency vehicles.
