

Dennis Diaz
Supervisory Air Safety Investigator
Office of Aviation Safety - Eastern Region

Date: November 25, 2025

Subject: ERA23FA256 - Inquiries sent to the US Air Force

In a memorandum for record dated June 30, 2023, NTSB Senior Aviation Accident Investigator Adam Gerhardt documented an interview with two military pilots that observed the accident airplane (Cessna 560, N611VG) during an intercept after the aircraft was reported unresponsive. Footnote 1 of that memorandum noted, "A representative with the USAF reported that no video was captured during the intercept."

Following the interview of these two pilots, Investigator Gerhardt sent requests to the USAF Party Coordinator to this investigation on September 7, 2023, September 14, 2023, and October 23, 2023. These inquiries asked about the feasibility of obtaining images/video of the accident airplane that may have been recorded during the intercept flight. Of particular interest were views that depicted the right side of the subject airplane. On October 27, 2023, Investigator Gerhardt received an email from a USAF representative that stated that no video footage or still images depicting the subject airplane's right side was available.
