NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On the morning of November 22nd, 2022, myself (Daniel CFI) and my student (Taylor Student Pilot) preflighted N704MD out of KFFL. Everything looked good, we planned on going to KCCO to practice some simulated engine failures and maneuvers since he had a pre-solo stage check coming up. We did our run-up and departed KFFL at 0928. We then made our way to KCCO and maybe 3-4nm away I gave him his first simulated engine failure. He ran his checklist, pitch for best glide and made the field. We did a touch and go and we came in now for our second power off 180. Abeam the touch down point, I pulled the power to idle to simulate his second engine out. My student pitched for best glide, ran his checklist but was getting too low and a little too far from the airport. I advised him to turn immediately to the field if not, we would not make it. The student did say he was uncomfortable with the approach and wanted to go around, however I told him to continue because I wanted to use it as a teaching lesson if something did go wrong, we wouldn't have time. My eyes were fixed down the runway and also looking at our speed. By the time I realized we were not going to make it, I quickly increased power. I was too late because I heard the tail struck on the airplane. I did not know how bad it was or the extent of the damage to the tail until after we landed and informed the maintenance department. Only thing I noticed was just the tie down anchor missing from the tail. The total flight time was a 1.4.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

This could have been prevented if I had just allowed my student to do the go-around and try the approach again.
