

N600C Maintenance Log Book Review

Hard Landing Accident
Rochester International Airport
Rochester, NY
March 29, 2023

Date of Accident: 2/11/2023
NTSB ID#: ERA23LA126
Lear 55, N600C, s/n 047

A review of the most recent maintenance log book and the current CAMP maintenance tracking program report for accident aircraft N600C did not reveal any issues. The aircraft was up to date on all of its maintenance requirements and was operating under a 14 CFR 91.409(f)(3) manufacturer recommended maintenance program.

As of the date of the accident, the aircraft was current on all inspection and maintenance items. The 14 CFR 91.411 and 413 inspections, as well as pitot/static system inspections, although due at the end of the month, were complete at the time of the accident.
