1630 EDT

[REDACTED]

it was taxiing my Cessna 180(N7772B) into Waypoint's ramp at Lunenburg and saw the marshaller directing me to a parking spot for fuel.

I was following his commands - watching him direct me into a right 180° turn to park when I felt a "thump." I shut the 180 down and got out to see a tear in my left wing tip.

There was a Partenavia N 920AA to my left front - it was parked and I didn't see it because I was watching the marshaller - who suddenly disappeared as I felt the thump.

It appears my left wing struck ~~the~~ one blade of the Partenavia's left propeller although the damage seems slight.

I have photos. There is damage to my left wing leading edge.
