Hi Stan,

Following are the details of the accident on Tuesday, March 21, at Waypoint Aviation.

I parked my airplane, a Partenavia P68B, N920AA, on the Waypoint ramp about 4:00pm. Although I've made up the parking space numbers in the attached diagram this is how they park airplanes at Waypoint. My airplane was parked in P4, facing east. In P8, there was a turbine Duke being refueled, and no other airplanes were on the ramp. Sometime between 4:00 and 4:30pm, Martha Lunken taxied down taxiway H, the entry to Waypoint. The lineman signaled her to taxi to the left of my airplane to make a U-turn into P1 for refueling. As the video shows, Martha attempted to make a turn between my airplane and the FBO. Her port wingtip struck my port propeller, moving it from the 10:00 o'clock position to the 2:00 o'clock position. The tip of my propeller is bent and has some rough scratches on it. The propeller will need to be overhauled and, based on Lycoming's AD 2004-10-14, my engine will need to be torn down for inspection.

I spoke with Martha after the accident, and she was adamant that it was the lineman who directed her to taxi as she did. In the video, it appears that he directed her to continue straight, as is usual, and started walking back to position P1. He then stops to make sure she is continuing straight, which she was. The he starts walking again and stops when he sees her starting to turn to the right almost directly in front my airplane. Her port wingtip was almost at a 90-degree angle to my airplane when it struck my propeller, then moving her airplane to be almost parallel to mine.

I will send you by We Transfer the photos, diagram, video, and letter of the accident.

If you have any questions, please call me.

Sincerely,

John
