STATEMENT: (PLEASE DESCRIBE IN DETAIL THE EVENT(S) THAT OCCURRED)

I watched the C421 land from my truck outside hangar 44. Upon landing the left main gear locked up immediately. Smoke came from the tire. The tire was wobbling and the plane started to go off the runway. As the left main gear went on the grass the left gear collapsed. No smoke came from the right main gear.

STATEMENT: (PLEASE DESCRIBE IN DETAIL THE EVENT(S) THAT OCCURRED)

The Plane made a normal approach. Looked like it would be a good safe landing. as soon as the wheels touched down the left, pilot side, wheel locked up. Smoke billowed out and never stopped. There was no smoke from other wheel.

There was a loud popping sound. then the plane made a sharp left. as soon as it went into the grass the gear collapsed. the plane spun 180 degrees. the passenger engine was then shut down.

The end.
