Narrative for the incident/crash of N1347T

Date: 5/11/2023, time approximately 1930

Place of crash: North of Selma, Al.

After preflight checklist was completed, with 48 gallons of fuel on board and one soul, I departed KPLR at approximately 1820 and departed to the south on a heading of 208 degrees. Take-off and climb-out were unremarkable. Appropriate radio calls were made on departure. At 2000 ft, I contacted ATC at KBHM and requested flight following down to KMVC at an altitude of 4500 ft. Squawk code was obtained. I continued to climb to the requested altitude during which the climb check list was completed. At 4500 ft, I leveled off and completed my cruise check list. At 30 minutes into the flight, I cut the fuel pump on and switched tanks. I then cut the fuel pump off and checked my fuel pressure and it was in the green. Shortly thereafter, Birmingham Approach handed me off to Montgomery Approach. The ceiling was broken at 4000-4500 ft and I contacted Montgomery Approach and requested to descend to 4000 ft. The request was approved with "descend at discretion". I leveled off at 4000 ft and then descended to 3500 ft for adequate cloud clearance. At 55 minutes into the flight, I experienced a power reduction with the engine slowing to what appeared to be an idle power setting. I immediately turned the fuel pump on, increased mixture to full rich, turned pitot heat on and attempted to return the engine to full power. The throttle seemed a little loose and the engine never returned to full power. During this time, I alerted Montgomery Approach that I was calling an emergency. Montgomery Approach contacted me and told me I was about 1 mile from Craig Field in Selma and then quickly told me that I was about 6 miles from Craig Field. I immediately located two open pastures for possible landing and selected the closest one for landing. I adjusted my descent to best glide speed of 70—72 kts for a Piper Cherokee 180, opened the co-pilot door and continued to glide to attempt a landing in the selected pasture. Unfortunately, I did not make the pasture and crashed into a thicket of pine trees. I then secured the aircraft by turning all switches to off and turning the ignition off and removing the keys. I removed my belongings and made it to the pasture. I was in constant contact with ATC and 911 during the entire process. I am thankful for all that were involved in this process.
