**Statement of Greg Boyette regarding the damage to Helicopter N9WZ
on 7/1/2023.**

After a thorough preflight I flew the aircraft solo to MacClenny Florida and landed uneventfully. No defects during the preflight or flight. Aircraft performed as expected. After landing, I performed a walk around post flight and preflight inspection; no defects were noted.

Approximately 12:00 noon after being on the ground about an hour, I briefed and loaded two passengers; Robin Eaddy (adult woman) and Miracle Wright (girl age 11).

Following the check list, I started the engine to prepare for flight. During the very beginning of the rotor engagement segment, I inadvertently stalled the engine. After the rotor stopped I began the engagement procedure again from the beginning and completed with no issue.

I performed engine Run-up and Ground Check with no defects noted. As I begin to raise the Collective an event occurred that was so fleeting that I was not sure that it had really happened. It was just a momentary, very slight vibration that subsided instantly. I remember thinking, "What was that?" I immediately lowered the Collective, performed a Magneto check, checked the gauges, felt for any vibration, and listened for any malfunction. Everything seemed to be in order.

As I slowly began to raise the Collective, instantly an extremely violent left to right rocking motion began. I considered lifting into the air in case it was ground resonance, but the motion was instantaneous and extremely violent. I was convinced that I had a major malfunction and not ground resonance. I did not want to be airborne endangering our safety. This was nothing like I had ever experienced previously with ground resonance. I bottomed the Collective and rolled the

Throttle off to idle. The motion continued. We had never left the ground. The aircraft disintegrated around us. I felt a blow on my head. I looked to my right and asked Miracle and Robln if they were ok; they motloned, "yes". I tried to position the controls to shutdown positions as we exited the aircraft; concerned of the fire danger from the gas leaks. We all walked away safely; we were checked by fire rescue and all refused hospital treatment at that time.
