Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing, Nose gear, engine, Prop, Right gear

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 7/5/2023, I planned a trip from KCLW (Clearwater Airpark) to KSRQ (Sarasota Intl). At approximately 11:00am I performed a pre-flight inspection per recommended checklist. Performed engine start and equipment checks per checklists prior to taxiing for departure on Runway 34. Performed engine runup with no issues noted. Entered Runway 34 (approx 1145am) and accelerated to take off speed with no issues. Rotated and flew off the runway. At approx. 100 ft and still climbing the engine began to roll back. I switched tanks with the fuel selector and engine continued rolling back to idle. I leveled off at approximately 200 feet and had no luck with engine and decided to land on the airfield., touched down in runway grass runoff at approximately 55-60 MPH and applied max aero braking and aircraft brakes. Aircraft skidded thru grass, the aircraft ran off the edge of the grass where there is a 3-4 foot drop off and came to rest on the entry gate to the airfield. I immediately shut off the fuel and mags, made a radio call to KCLW Unicom informing them of situation and then turned off electrical power. Battery was removed from aircraft as requested by fire company.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Perform fuel sump drain with the fuel selectors in each selected tank.
