

Joshua Young
Air Safety Investigator
AS-ERA

Date: 7/31/2023

Subject: ERA23LA291, FAA Flight Control Check

Contact: Danny Cox, Principal Maintenance Inspector, Federal Aviation Administration

Inspector Cox emailed the IIC on July 10, 2023, stating he had done a flight control check of PR-ZVL as the pilot claimed an autopilot bracket had not allowed him to achieve full aft elevator authority. Below is from Inspector Cox:

"I went back and moved the bracket around while the pilot moved the control handle and the only way, I could get the bracket to jam was in a forward movement not aft."
