Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On short final the pilot had a medical event and became unresponsive. Prior to passing out, the pilot realized that he would not be able to land the plane, he retracted the landing gear and added power. Pilot was slumped on passenger sitting in right seat at that point. Passenger (not a trained pilot) was able to take control of the plane and made several circles in the airport vicinity. Passenger was able to put the plane down on it's belly in a grassy section of the airport.
