DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

I have not seen the aircraft since the accident.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

During this incident on 31 July I was injured pretty severely, to include a head injury. While some of the details surrounding the incident are incredibly vivid, others memories are somewhat hazy so I will explain it as I recall to the best of my ability.

On 31 July 2023, I arrived at work at approximately 0900. I remember conducting my preflight when I arrived.

Since working for Barnstormers, starting in 2019, I have conducted the same preflight on both of the planes that I have flown there. I begin by checking the oil and then checking the fuel tanks starting with the left tank and then moving to the right tank as it is by the door. I then move to the cockpit. While leaning into the door of the aircraft and I inspect the interior, adjust the altimeter to 0' elevation and secure fuel tester from the seat pocket. I then move to the front of the airplane and begin inspecting the exterior, beginning with the propeller then moving around to the right side, then tail and then back up the left side until finally reaching the left side of the engine back at the propeller ensuring that I drain some fuel from each of the 3 petcocks into the tool, to check for water and debris, as I come to them in my inspection sequence.

After completing all of my prep for the days work I remember being propped off and getting clearance to taxi and then take-off around 0955 to pick up my first banner. At approximately 1100 I dropped my first banner and picked up my second. I then began flying toward KMYR down the coast. After arriving adjacent to Regency Towers Resort in Myrtle Beach, I turned around and began moving NE at 500 ft AGL along the coast. Just after passing the 14 Ave Pier in Myrtle Beach my engine shut down. I immediately began the restart procedure knowing that I needed to get it restarted while the propeller was still turning. It did restart and everything seemed to be ok so I immediately started to head back to KCRE until the engine shut down again.

This time it would not restart so I began looking for a safe place to land where I would not injure anyone below but could still land close to the beach in the water as I knew that the beach was not an option because of the many people. I located an opening that appeared to be the best spot and glided toward it while maintaining my banner hoping that it would anchor the plane from flipping once hitting the water. Upon reaching this area I attempted to dive below the banner and slow the plane down as much as possible before impacting with the water but unfortunately there was a man standing alone out in the area in front of me. Worried that I would hit and injure or kill him I immediately nosed over and impacted into the water at approximately 35-40 MPH.

After the impact, due to my neck injury, I was unable to move my arms or legs so I could not disconnect my restraint and exit the airplane or pull myself up out of the water. After approximately 5 minutes of struggling to keep my mouth above the water people from the beach came out and rescued me. I was taken to the hospital where I underwent emergency spinal surgery. I was in the ICU at Grand Strand Hospital until 8 Aug and then was moved to Tideland's Health Rehabilitation Hospital in Little River, SC where I remained until being released on 17 Aug. I am still under doctor's care and recovering from my injuries.

I remember filling both of the fuel tanks at the end of the workday prior to this incident. ———end of statement—————

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
