BEFORE STARTING CHECKLIST - EXPANDED

1. Parking Brake - Set

Assure parking brake is set as to prevent inadvertent movement of aircraft when starting engine.

2. Doors - Secure and Locked

Assure forward and aft doors are both securely closed and locked.

3. Seats/Seat Belts - Briefed/Secure

Brief all occupants on seat belt usage and ascertain that all seat belts are properly secured for flight.

4. Electrical Equipment - Off

Assure all electrical switches are in the off position.

5. Circuit Breakers - In

Confirm that all circuit breakers are in and that none are open.

6. Fuel Selector - Fullest Tank

Select the most full main fuel tank for takeoff.

7. Master Switch - On
