

Joshua Young
Air Safety Investigator
AS-ERA

Date: 3/21/2024

Subject: ERA24FA096, ForeFlight Information

Contact: Josh B., Pilot Support Team, ForeFlight

The ForeFlight support team was contacted via email on January 29, 2024, to see if either pilot used the logbook feature of the ForeFlight system or if they had entered any other information related to the accident flight. A response was received by email on March 10, 2024 and contained the following information.

"We found a ForeFlight account that appears to match (based on firstname-lastname, as well as last date of use) for Mr. Badenjki. He did not have N737VC in the account, and had never filed any flight plans through ForeFlight, nor had he created any Flights in the app (a prerequisite for generating a weather briefing).

No routes were entered into Mr. Badenjki's account on or around 23 January.

Despite those, he does appear to have been using the ForeFlight Logbook, and the reports and a summary of the DRAFT entries (entries automatically created but that had not yet been reviewed by the pilot and approved, so are not included in the reports) are attached.

We found a ForeFlight account that appears to be a match (based on firstname-lastname, as well as last date of use) for Mr. Kebe. He did not have N737VC in his account, and had also never filed an any flight plans through ForeFlight, nor had he created any Flights in the app (a prerequisite for generating a weather briefing).

The following routes were entered into Mr. Kebe's account prior to the flight:

Date/Time (UTC) Updated Route String

1/23/2024 22:43:43 KHOW KPHK KIMM KVNC KHOW

1/23/2024 22:32:42 KIMM KHOW N202CA 10000FT

Mr. Kebe does not appear to have been using the Logbook feature, as there are no approved entries in it. We have attached a summary the Draft logbook entries."
