

09/25/2024

At approximately 0705 on 09/25/24 I was outside near our loading zone. We heard the sound of sputtering engine from what we believed to be an airplane. As Brian and I looked up to the south of the Latham Pool plant we saw a very small plane start to make a popping noise. Then it went into a nosedive and was smoking with visible flames coming from the airplane. We began to run to the plane that had crashed into the field south of state Rd. 54. As we were running to the downed plane, [REDACTED] As we got closer to what had now become a large fire the sounds coming from the wreckage stopped. I was on the phone with 911 the entire time while running to the crash site.
