

Adam M. Gerhardt
Senior Aviation Accident Investigator
Office of Aviation Safety, Eastern Region

Date: 10/25/2023

Subject: ERA24LA020

Contact: Brad Gottschalk (FAA Inspector)

The individual noted above provided the following information via a telephone call. The below contents are a summary of what was reported:

- The airplane's nose and forward area, and propeller are damaged.
- The pilot did not report any mechanical issues, nor any injuries.
- The engine mount was bent during the accident, which is connected to the Nose Landing Gear (NLG) structure. It was his assessment that the mount will need to be replaced, based upon discussions he had with a mechanic who evaluated the damage.
