Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Left wing and engine propeller damaged. Engine requires inspection

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On December 8, 2023, I had a flight scheduled at 11 am in N955PT with my student Paola Serrato, she is currently training to get her private pilot certificate. Around 11:20 in the morning we got the keys of the aircraft, then we went to the ramp to pre-flight the aircraft and make sure our airplane was in an airworthy condition to fly. About 11:40 am we got in the airplane, turned on the engine and did our checklists.

Radios were set and we listened to 124.0 (atis frequency), after we got the atis information we contacted 133.0 to ask for touch and goes. We received the instruction to communicate with 121.7 which is ground frequency, we were number two in sequence at the spot 14. Around 11:45 in the morning we received the clearance to Taxi to run-up area whiskey via Delta taxiway, as we approached the run up area I saw a jet bombardier challenger N334JE in the run up area with its nose facing east northeast. (Attached diagram)

I asked my student for the controls to make sure we were going to keep a safe distance from the jet. As soon as I passed behind the jet to enter the run up area, we were suddenly blown away because of the jet blast of the engines. The right wing of our aircraft (Cessna) went up making the left wing go down and striking the ground, we were dragged for around 30 - 40 feet. The propeller of our airplane hit the ground creating significant damages. Our airplane got to a stop but it kept shaking because the jet still had power in its engines and we were still being impacted by the jet blast, so I pushed the throttle a little bit to move forward and put the Cessna away from the blast.

Ground control at that moment asked me if I needed any assistance so I replied to the communication saying we don't require any assistance, the airplane needs to be towed, the controller said say again so I replied saying the airplane needs to be towed. I turned off the engine, kept the radios on and I heard in the communications that ground control asked the jet what they were doing, the jet replied we are burning out some fuel. After that, I called the ground frequency saying ground ptc 955 is going to be out of the headsets.

I made sure we were fine, so I asked my student if she was ok, gladly we didn't suffer any traumas or injuries. I got off the airplane, waited for the ground support because the airplane was going to be towed. Some minutes later, ramp 60 arrived, asked what happened and he started his required procedure. They informed the tower, then I got a phone call from the tower to ask me what happened and then another phone call from the FSDO. As per the FSDO, we were cleared to move the airplane, so our airplane was towed and escorted back to spot 14.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Better communication between the Jet and air traffic control agencies (Ground control).

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
