

Investigator Name: Leah D. Read
Title: Sr. ASI
Division: ERA

Date: February 2024

Subject: ERA24LA066

Contact: Jim Booth, Director of Maintenance, Lift Academy

According to the Mr. Booth, Lift Academy conducted a fleet-wide inspection of their aircraft and fuel trucks/farms and found no evidence of water contamination. He reported that they used an anti-microbial additive (Biobor JF) approved by the Original Equipment Manufacturer (OEM) to their fuel at 25 hr. intervals to prevent corrosion/contamination since diesel engines/fuel are susceptible to water/microbial contamination. They were unable to determine the source of the corrosion/contamination found in the fuel injectors.
