

Accident Report for N5954Q

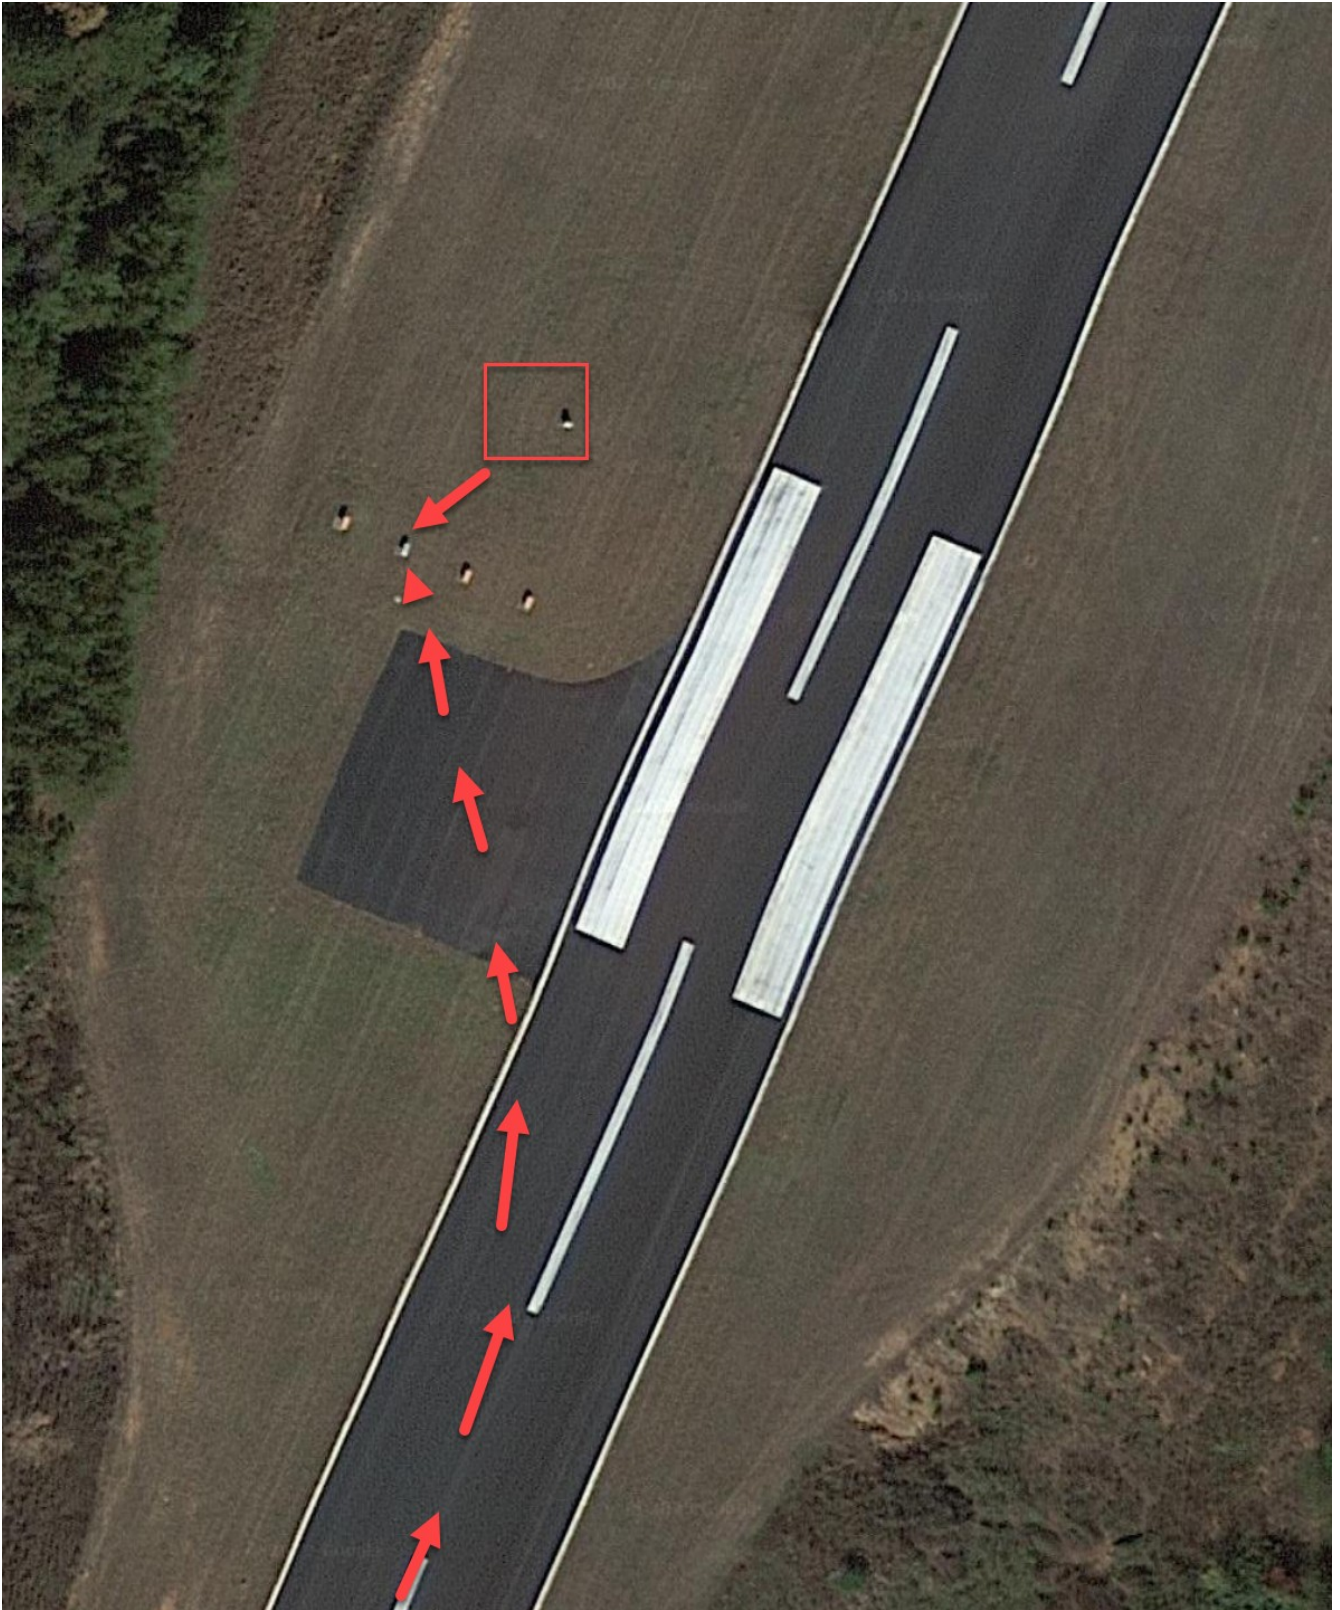

On October 22, 20023 at 14:10 N5954Q was scheduled for a maintenance flight. The Pilot in command was Jon Andrew Dominique. I Wesley Zimmer was seated in the right seat.

I observed that the pilot in command perform pre-flight checklist at the hold area prior to entering runway 03 for back taxi.

Pilot in command lined up on runway 03 and applied takeoff power. The aircraft tracked straight down the center line and lifted off without incident. Aircraft made a left climbing turn to pattern altitude and proceeded downwind of runway 03 for a left base turn for landing on runway 03. I observed on final that the aircraft stall horn sounded (ADSB track indicates that the airspeed got down to 66 m.p.h on final) Pilot added power for a go around. On the second attempt for landing the aircraft was high on approach and missed the touch down beyond the threshold. The pilot in command made another go around. On the 03rd attempt for landing approach was stable and landed without incident. We taxied to the ramp to perform a visual inspection of the aircraft.

We then proceeded to start the aircraft and taxi back to runway 03 for takeoff. The pilot performed pre flight checklist before takeoff. Pilot lined up on runway 03 applied take off power and started to roll down he runway at which time the aircraft started to track left of center-line. The pilot applied brakes one time and released and did not make an attempt to apply brakes to come to a stop. The pilot lost control of the aircraft and veered off the runway and impacted Papi lights with left wing and came to a stop. We exited the aircraft and called line service to tow the aircraft back to the FBO. END

Wesley Zimmer
