NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I was practicing Take Offs and Landings at KFMY (Fort Myers Page), which is home base, on Sunday, March 3, 2024, around 1:30 in the afternoon. Prior to taxi, the KFMY ATIS and ForeFlight reported winds of 220 at 6 knots. I took off and landed twice on Runway 23 with great landings, and proceeded around the pattern for a 3rd landing. On downwind, I was instructed to follow a Cirrus Vision Jet that was on final. After the Jet had passed, I proceeded to base. On my turn to final, I felt a strong gust of wind catch and rock my wings, but I was able to continue my turn. On the approach to the runway, the tower announced winds were 200 at 8 knots. The airspeed (55 mph) and altitude were on point for the American Legend (AL -11) Cub. The landing had a few bounces, which happens. The plane was landed and under control when it started to take a turn to the left as the wind seemed to swirl and change directions. I attempted to redirect the plane down the runway, but unfortunately, the plane continued to ground loop toward the grass. I then proceeded to pull the mixture, and thought all was well, until the left wing struck the runway sign. When the plane came to a stop, I removed my headset and shoulder harness/ seatbelt and exited the plane. We were then able to walk the plane back to the hangar.
