NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On the afternoon of March 2 2024 I David N Pathio was headed from KBTow to KZPM. It was an ordinary flight with good weather. The winds were out of the south east at approx 10-12 knots. My hangar is next to runway 5/23 FBO intersection and I decided to join down wind for runway 23. There were several airplanes in the traffic pattern with the majority using runway 19 which is usually utilized by the jump center. Because of the traffic I decided to do a wider than normal entry to down wind, base, and final and also maintained a higher than normal altitude to remain clear of traffic. Before entering base from downwind my traffic avoidance went off with traffic directly off my nose and barely 100 feet below me. Traffic was high wing Cessna and in left traffic instead of right traffic for 19. We communicated and acknowledged our position so I proceeded into base for runway 23. Shortly after as I am beginning to go from base to final and right after I hit my boost pumps my traffic alarm went off again. At this point my focus shifted from landing to identifying traffic which was in wrong traffic pattern. I couldn't see below me and he couldn't see above him so I maintained altitude. Emailed description.
