Subject: ERA24LA143 – Garmin GEA-24 email report

Date: Tuesday, October 15, 2024

Email report instructions:

The narrative and attachments from this email report may be used in other reports at the discretion of the IIC. This email, including attachments (if applicable), should also be placed in the public docket by the IIC.

Email report contents:

The Vehicle Recorder Division received a Garmin GEA-24 (s/n 2J2024216), which had no exterior damage (see ERA24LA143_1.jpg). The Garmin GEA-24 is a configurable engine interface module that converts analog engine sensor information to a digital format so it can be displayed on a Garmin G3X or G3X Touch device.

The Garmin GEA-24 does not have any internal non-volatile memory, nor does it record any data. Thus, no data were recovered from the device.

Prepared by:

Kyle Garner, Sr. Aerospace Engineer (Recorder Specialist), NTSB RE-40
