This afternoon at around 2:00pm Noelle Millner and I took off towards Shiloh airport (KSIF) fro Greensboro (KGSO) on a training flight with the intention of practicing pattern work and landings with the possibility of having Noelle do her first solo given that the conditions were favorable. We arrived at KSIF and Noelle performed three laps of the traffic pattern with me in the airplane without incident. Her landings were good and her patterns were consistent. The wind was reporting 6kts and the windsocks at the approach end of the runway was limp, indicating low wind. After our third landing I signed her logbook, asked if she had her required documents and she confirmed that she did, and I told her to do three stop and gos and taxi back to the ramp. Her first landing was uneventful. On her second landing, the nose wheel came down and she started to porpoise. After two oscillations she came to a roll on the runway and taxied across the hold short line. She told me on the radio that she couldn't taxi any more and I told her to cut the mixture and we towed the aircraft to a parking spot and tied it down.

I was coming in to land on my second lap of my solo, I heard planes call in saying they were on final and wanted to get out of the way as soon as possible. I came in to land and the papi's weren't on and my depth perception was very flawed clearly. I was too high and fast coming in on short final. I hit the runway and dolphined about 4 times and my flight instructor Chris called on the radio to come back in. I couldn't use the rudder pedals to taxi off the runway, so he came and got me. We then towed the plane.
