Federico Van Tienhoven [REDACTED] Front seat passenger		
SUBJECT Accident PJC airport 4/20/2024		
DIGEST On April 25, 2024, IIC contacted the front seat passenger to see if there were injuries to either him or the back seat passenger. He said they were both fine and did not seek or there was no need to seek medical attention.		
As a non pilot, the front seat passenger indicated that before touchdown all of a sudden they smacked into the ground and he felt that the airplane was going to tip over to the right. He didn't know why it didn't and that the plane stopped on the side of the runway. The plane tipped forward then settled back in the upright position. The pilot shut things off and said let get out of here. The passenger could not open the passenger door and they all had to exit out of the pilots door.		
CONCLUSION, ACTION TAKEN, OR REQUIRED
