Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft damage to the landing gear retraction system, belly skin and stringers from the nose to the rear carry-through structure, right wing leading edge to include 2 nose ribs, right wing tip ground down through the skin, right side bottom cowling, and both right and left propellers.

SGJ airport runway sign for 20-02 located at the intersection of runway 31 and 20 was destroyed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On April 1 at about 12:30 we departed St Augustine Airport VFR on a test flight after an extensive annual inspection. The pilot was Joaquin Thomas Solano and the passenger was Liam Mullane, the AI mechanic. At about 500 ft we initiated a turn west to go to an area where we could proceed with the engine break-in process. At that time, we lost complete electrical power. We decided to return and land. We had lost radio communication so we contacted the tower via cell phone, and declared an emergency. We then proceeded to manually lower the landing gear and secured it until it would not turn any longer. Soon after touch down the right landing gear collapsed and we came to a stop on the right side of runway 31. No one was injured. April 1, 2024.
