Incident regarding Aircraft N-313-RB

Location : Manatee in Airport, identifier 48X

Palmetto Florida .

On :5/30/2024

On Thursday, May 30, 2024, I departed Saint Petersburg Alfred witted airport identifier, KSPG at approximately 1145 to fly approximately nine nautical miles to Manatee in Airport identifier 48X to pick up approximately 35 gallons of fuel.

After landing at Manatee Airport, and picking up the fuel i taxied to the full length of the Grassfield runway , this was at approximately 12:30 PM , I prepared for a short field takeoff and all the characteristics of the aircraft seemed to be operating as expected at that time,

I set up for departure on a full length takeoff, apply the brakes, flaps applied full throttle and then started down the Grassfield for takeoff, at about the 5/8 to 3/4 mark, the airspeed indicator was alive and moving towards my rotation speed ,just before rotation speed at the same time a wind gust quickly took me off the ground to about 10 to 15 feet high and the aircraft quickly fell back to the ground. I had initiated an aborted takeoff, but the end of the runway was only about 800 ft away so I re-applied full power to try to get back into the air. That was unsuccessful and I ended up straightahead in the watermelon field.

There was no one on board except myself, and nothing in the Aircraft, except for a piece of concrete in the aft storage area that I use to counteract for my the lack of weight in the aircraft. The weight of the concrete is approximately 75 pounds and was secured by the cargo straps.

The unexpected wind gust was the contributing factor to the incident.
