

Eric Alleyne
Air Safety investigator
AS-Eastern Region Aviation

Date: 7/17/2024

Subject: ERA24LA234 FAA accident debrief

Contact: David Clouse, FAA Inspector IIC

During a telephone conversation with inspector Clouse, he reported that N8536G, was involved in a wildlife strike accident at Fayetteville Municipal Airport (KFYM), resulting in substantial damage to the aircraft's horizontal stabilizer. He said the pilot reported during a takeoff roll on runway 02, several deer ran onto the runway when the aircraft was near rotation speed. The instructor took control of the aircraft, aborted the takeoff, and applied maximum braking. The aircraft struck one of the deer, impacting near the left door and sliding back to the horizontal stabilizer. The instructor taxied to the ramp, turned off the ELT, and assessed the situation. Both occupants were unharmed.
