The date of the accident the wind where within the parameters set up by the IP I did the preflight stated up lifted the bird vertical pulling 25MPa 2900 rpm everything feel good flow out to KLCA about 25 min flight did soom practice approach on 08 than taxed over to the no usable runway and practiced landing on the X,s when I got down to 5 gal of fuel taxed over to the pump put in 10 gallons then took off to home the flight was pretty calm I set the trim and she stayed right on course for home I made the slight left turn into my property slow down to a hover 2900 rpm 25 MPa everything was in the green started to slide forward and the thing I remember was that helicopter started to turn to the right very fast I thought I lost the tiltrotor I stuffed the left pedal all the way and it still turned right, I came to and Wayne Hutchinson was holding my head up.

Thanks Karl
