Bradley Tweed - Owner/Pilot of N3304R				
Johnson City Medical Center				
[REDACTED] Johnson City, TN 37604				
SUBJECT Events of N3304R Accident				
DIGEST				
Provided PBR and conducted interview with Mr. Tweed in his hospital room. Mr. Tweed was completely coherent but also suffered from memory gaps like Mrs. Tweed. Mr. Tweed stated he vaguely remembers coming in on the approach and nothing seemed abnormal. He stated that all he remembers was "seeing a hangar and turning to the right to avoid it. I just remember turning to the right and seeing trees." He said he vaguely remembers being removed from the aircraft. I asked Mr. Tweed if he remembered if he may have adjusted engine controls while turning and he replied "I do not have any memory of that". I informed Mr. Tweed that in the coming months, being that his rehab is anticipated to be lengthy, an Operations inspector will be contacting him for future instruction.				
Mr. Tweed verified that his maintenance logbooks are located at his home in a safe unlocked by his fingerprint. I informed him that I will not need those being that I got what I needed from his IA but that the insurance company will be asking for them in the near future				
Mr. Tweed said that he has been told that he will be in the hospital for at least another 4 weeks and is anticipating 6 months or more worth of rehabilitation. He said he was uncertain of his aviation future.				
CONCLUSION, ACTION TAKEN, OR REQUIRED
